

ID #	Name	Poster Title
1	Muhammad Mahar	Uncertainty-Aware Cosmic-Ray Direction Reconstruction: Synthetic Validation and a Pierre Auger Case Study
2	Isabella Botelho	Machine Learning Model for the Milky Way's Galactic Disk
3	Nicole Muchos	Comparing the Milky Way to Simulated Galaxies
4	Anna Karlova	Neutron Soup for the Soul: Quantum Effects on Neutron Capture Rates in Neutron Star Black Hole Mergers
5	Diego Rodriguez	Simulating Dark Matter and Gas in the Bullet Cluster
6	Jason Gabriel	Forecasting the Weather on Ultra-Hot Worlds: A High-Resolution Study of WASP-189b
7	Mehar Sahota	Detection of Gaseous Components of the Epsilon Eridani Debris Disk with SITELLE
8	Nicole Jiang	Early Black-Hole Growth Constraints from JWST
9	Matheus Maica	Algorithm for Matching Branches in Infrared Spectrum of NCNCS
10	Devseerat Sran	From AFM Images to Polymer Mechanics: Evaluating Geometric Information Preservation
11	Joseph Geu David Kenyi	Probing Chiral Biomolecules in Liquid Media via Optical Vortices Carrying Orbital Angular Momentum.
12	Nayanika Ghosh	Developing Portable Magnetic Resonance (MR) Systems for Non-Invasive In Situ Monitoring of Plant Physiology
13	Amir Kamalian	Effect of composition on PMA in GdCo thin film
14	Felix Jiang	Where do neural network wavefunctions break down? Sign structure and frustration in a two-dimensional quantum magnet.
15	Lyra Collins	Sideband cooling low frequency resonators
16	Josefina Ramirez Diaz	Structure and Site Disorder in the BiRGeO ₅ Rare-Earth Series
17	Irmak Aytekin	A Synchronisation Gate for Adapting MKID Photon-Counting Data to Fourier-Transform Spectral Reduction
18	Ella Poku	Modulation, Error Correction, and Depth Sensing for Simulated Muon Communication Through Dense Rock
19	Rahul Nivash	High-Performance Computational Modeling of Optical Turbulence and Discrete-Time Chaos in the Ikeda Map
20	Ahmet Levent Takir	Non-Linear Dynamics of a Playground Swing
21	Noah Miggiani	Beyond Standard SRIM Outputs: Advanced Analysis and Visualization of Ion-Solid Interactions
22	Sophie Barbieri	Tuning the Plateau-Rayleigh instability with Magnetism
23	Alice Calvert	Investigation of reflection ellipsometry for the measurement of Faraday rotation of core-shell nanoparticles
24	Layal Fayyad Al kishawi	Development of a Reproducible Floor-Based Total Body Irradiation Technique for Stem Cell Transplantation in Blood Cancer Patients
25	Gavin Hopper	The analysis of seasonal variations in elemental concentrations in human toenails
26	Kyeong-Min Gooh	Acoustic Simulations of a Phased-Array Transducer for MRI-guided Focused Ultrasound
27	Jeff Zhan	Development of a Multi-Sample Target System for Proton Irradiation Experiments
28	Cheyenne Monk	Improving Performance in Low-Background Cryogenic Experiments
29	Hoi Yiu Chiu	Multi-photomultiplier tube (mPMT) Optical Response Modelling Studies: Optical simulation, Measurement and Scan Method Validation
30	Prathmeshsingh Kurmkshatriya	Construction of a Highly Uniform Magnetic Field (B ₀) for the nEDM Experiment
31	Bowen Deng	Bragg Tuning in Nanowire Distributed Bragg Reflectors via Axial Tapering
32	Jonathan Robinson	Terahertz polaritonic states in metamaterial-coupled organic thin films
33	Misaki Flanagan	Beyond visible light, harnessing the Terahertz spectrum
34	Abdullah Mustafa	Towards Time Resolving Single Photons
35	Ziqing Pang	A high-efficiency ytterbium beam source for laser spectroscopy and optical clock experiments
36	Kaitlyn Emmell	Examining AI Use & Self-Efficacy Among Undergraduate Students in Physics & Astronomy
37	Benjamin Najem	Quantum Defect Analysis of High Precision Energy Levels in Helium
38	William Conlon	Quantum Batteries: An Overview
